

Gordon A. Cain Center for STEM Literacy

The LSU STEM Pathways is a program run exclusively by the Gordon A. Cain Center. It is designed for K-12 students in Louisiana's public, charter, or private school systems to get hands-on experience with STEM.

LSU partners with schools across the state to prepare teachers, students, and administrative staff to deliver more than 30 STEM courses plus STEM modules for middle and elementary.

SUMMER TRAINING INSTITUTE

June 3 - June 18, 2024

June 19 - July 3, 2024

Training is **virtual** with
synchronous and
asynchronous components

Detailed course-specific schedule will be available mid-March. To learn more, email us or visit our webpage:

stempathways@lsu.edu

www.lsupathways.org

ELEMENTARY | MIDDLE | HIGH

Up to \$400 in CTE/CDF funding per student per seat for HS credit courses (Up to \$159 in CTE if taken in middle school)

High school credit in middle school

SPS points for Industry Based
Credentials and Dual Enrollment

Vertical alignment of STEM curriculum
from kindergarten through high school

Benefits for Students

High-Quality, Project-Based Standards
Aligned Courses and Modules

Earn LSU Pathway Certificates and
Opportunity for Industry Based Credentials

Opportunity to apply for
Scholarships at LSU

Dual Enrollment opportunities
(High School only)

Benefits for Teachers

Access to LSU graduate tuition
scholarships and support programs

Opportunity to participate in grant funded
STEM education research

Access to a minimum of six free
Community of Practice sessions

In order to qualify for the benefits shown above, your school must sign a Memorandum of Understanding with the Cain Center to **offer** an LSU STEM Pathways course or module. The course must be taught by a classroom teacher **trained** through the Cain Center. We invite you to become part of the
2024-2025 LSU STEM Pathways Program!

If you are interested in other STEM programs such as Code.org, IGNITE, Dual Enrollment, Choice Credit, or other initiatives, please email: caincenter@lsu.edu or visit www.lsu.edu/caincenter/

Will you offer an LSU STEM Pathway course in 2024-25?

1. February 1 - Plan your 2024-25 LSU STEM Pathway courses

Review our course offerings in the [LSU STEM Pathways Course Catalog](#) to determine which courses you want to offer at your school in 2024-2025. If you are a new school, will be offering a new course, or have a new teacher for an existing offering at your school, these teachers must be trained by the Gordon A. Cain Center. All courses must be taught by a trained teacher which requires that teacher to attend our Virtual Summer Training Institute. Details available March 15th.

2. March 15 - Receive and review electronic Memorandum of Understanding

On March 15th, the 2024-25 Memorandum of Understanding (MoU) will be emailed to all interested schools. If you do not currently offer a pathways course and would like to receive this email, please complete an Interest Form. [Click Here](#)

3. May 15 - Return signed MoU

All new AND returning schools should complete the MoU by the May 15th deadline. For new course offerings, the MOU will also serve as the registration for your teachers for the summer training institute.

4. May 15 - LSU will send new teacher training confirmation emails

After LSU receives the MoU, teachers who need to be trained in the Summer Training Institute will be provided a training confirmation email containing further details.

For questions about the Summer Training Institute & MoU, please send an email to stempathways@lsu.edu.
